Oi you!

Nu as vrea sa scriu despre cluburi, trupe underground ce au uitat sa mai si cante si parteneri media, de peretii facebook plini cu motto-uri despre viata si idei de Hollywood, de aceleasi placi puse la tv si radio despre viata grea, schimbare, politica de doi lei si criza economica.

Undergroundul traieste bine si o sa traiasca prin noi, cei care isi cumpara inca cd-uri, cei care merg la concerte si fac concerte, traieste prin oameni frumosi si simpli, prin noi cei care inca bem apa de la robinet fara filtru, cei care ne mai adunam la o bere la o scara de bloc, prin noi astia care inca visam si inca avem puterea de a spune fuck off la tot ce inseamna politica si mizerie, prin trupele alea care vin sa cante pentru 100 euro si o fac cu placere si dupa iti dorm pe canapea in sufragerie.

Ma bucur ca am cunoscut o multime de oameni frumosi si buni de la care am avut ce invata, prieteni autoeducati in fata blocului si cei care au invatat sa se bucure de ceea ce le place, simplu.

Putem sa cladim tot ce dorim, putem sa ne pastram zambetul si pentru zilele mai putin roz, putem sa transformam tot ce e gri in culoare.

Mersi CST, Constangheles care-i treaba? Timisoara, Bucuresti, Cluj, Brasov oameni frumosi si simpli de peste tot, tu pentru ca ma faci sa zambesc. Prieteni care isi stiu numele si voi cei care sunteti inca pe aici. Ma inclin.

TIME TO LIVE / ANGSTBREAKER

The history of this split goes back to 2009 when some of guys met in Kiev while playing in other bands. After Angstbreaker has been founded in 2012 they got in contact again with the guys from Kiev, starting to talk about a split record. While Angstbreaker plays fast, straight and unpolished Hardcore, Time To Live sounds more Punk with edges but if you listened to their songs for 2 or 3 times you will hum their melodies.

TIME TO LIVE (KIEV)

Four crazy fuck ups met each other in Kiev and calls themselves Time To Live! They are as they are, and if it is a matter of course for you than come to their shows, feel their energy, and go fucking mad with them!

Rock together! Time To Live is coming!

tmtlv.ua@gmail.com

ANGSTBREAKER (LEIPZIG)

Angstbreaker was founded 2012 by six guys from the lower eastside of Germany, offering hardcore without small-minded constraints with two singers and fast melodic guitar. We are too old to die young, that means our topics mostly ain't "no future" stuff.

NUMMEN

NUESTRA LISTA NEGRA

Nummen presents the new album *Nuestra Lista Negra* from 2013, 4 piece hardcore punk from Spain. 11 tracks speaking of social problems, a strong antifascist message and some irony regarding the punk scene worldwide. The album was produced 100% DIY by the band and you can get in touch on facebook.com/nummen.hardpunkrock. You will enjoy it special if you are into this genre. Full of energy and like a blast for your stereo. We recommend: *Brigadas Internacionales* and *Tu pais te necesita* - two serious songs with a strong message against army, antiviolence and antifascism. The way hardcore punk should be, full of anger and themes with fists in the air. DIY the way we like it. The good music is still here in the underground baby!!!!. Cheers.

AVAILABLE THRU
FLIX RECORDS.

Bay Area punk rock group Heartsounds will release their third full-length album, *Internal Eyes*, on October 18th via Flix Records (Cargo / Plastic Head Distribution) in Europe. In anticipation for the upcoming release Heartsounds has premiered a new song titled "The World Up There"

Internal Eyes was recorded, mixed, and, mastered at Castle Ultimate Studios in Oakland, CA in June & July of 2013. The band once again called on producer/engineer Zack Ohren for the production of the album, resulting in what can only be considered the most sonically impressive and aesthetically pleasing Heartsounds record to date. While 2009's *Until We Surrender* marked the band's debut effort, tracked solely between Guitarist/Vocalists Ben Murray and Laura Nichol, *Internal Eyes* is the second full-length album (after last year's *Drifter*) to include drummer Trey Derbes as a crucial songwriting partner to the group. *Internal Eyes* also marks the first album with bassist Bobby Taul, who helps in achieving a more solidified and tighter-knit rhythm section than ever before.

"A lot has happened to all four of us in the last two years since the release of *Drifter*, and we are now in a place as a band that feels more natural and fun than ever, and I feel like this shows through on these 10 new songs" says Murray. "We're not a band that cares about much besides writing the best possible record we can at any given point in our lives, both personally and musically. I think *Internal Eyes* is the next logical step in our sound, and we hope that our fans feel the same."

STÖJ SNAK / FUCK EP

The EP was written, recorded and produced by highly productive Niels Højgaard Sørensen - the man behind Støj Snak - and follows *Planned Obsolescence* and *Songs About Beliefs*, both released in 2012 through 5FeetUnder Records and TNS Records. The *FUCK EP*, however, is released without any labels and available for pay-what-you-want.

GOOD TO KNOW

Niels has musical roots deep in the underground soil and he has travelled most of Europe and even as far as Russia with the melodic hardcore band *Mighty Midgets* and during the last year with *Støj Snak*. Both bands have a number of releases under their belt and has reached great acclaim in the underground but remained below the mainstream radar.

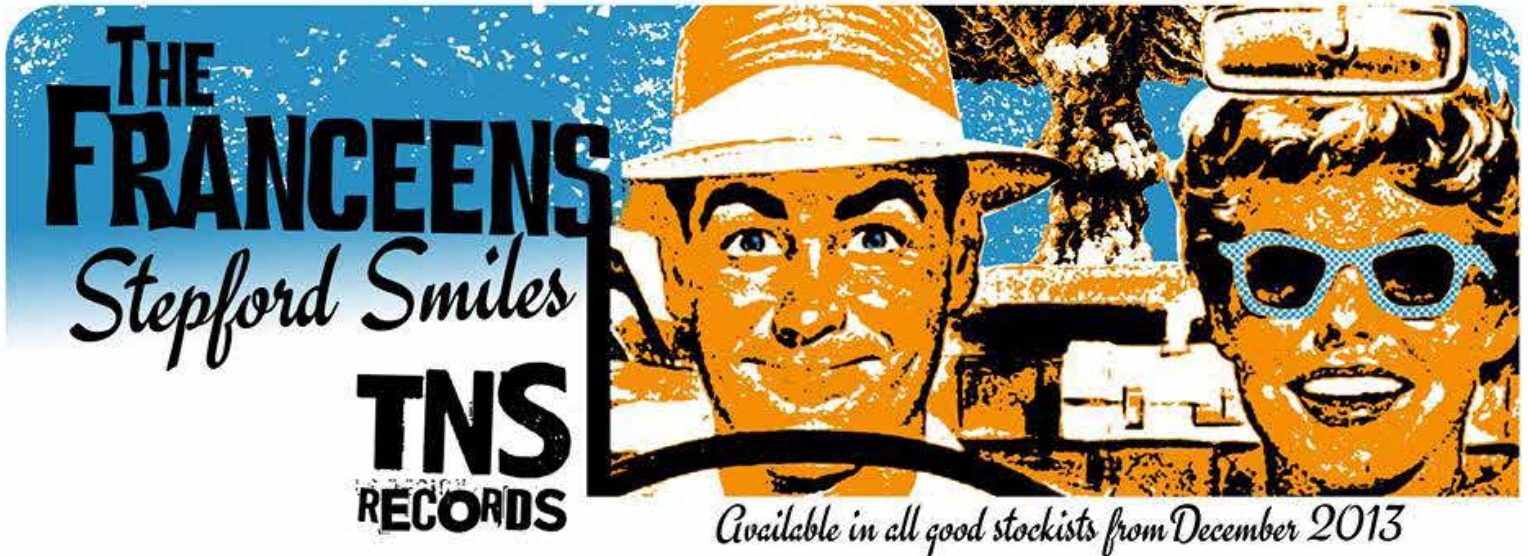

Støj Snak moves towards a more folky sound but remains true to the DIY ethics and political outlook of the punk scene. It also does not take long to find the punk energy in *Støj Snak*'s music which has been described as if Bob Dylan started a punk band - especially live where *Støj Snak*, only armed with just a guitar, a harmonica and a lamp, have incited to heavy sing-along and well as both mosh pits and crowd surfing.

THE FRANCEENS

ABOUT

They play high-energy garage/punk, which has a 50's twist to it. The music is delivered with ferocity, honesty and precision. It's twangy, intense and full of raw power. The band is a tight combination of catchy riffs and vocal hooks, backed up by a solid rhythm. After seeing them live in the north-west many times, and following their awesome gig for us last year, we had to get involved in their forthcoming album 'Stepford Smiles'.

They are an exceptionally hard-working band. Both in playing a large amount of gigs across the UK and in supporting the punk scene in York. The Franceens fight for DIY punk rock and believe in supporting your local live music scene, whilst also trying to discover and support new bands from further afield. Having also released their debut EP entitled 'Duck and Cover' on their own DIY label, which is available now for free from their facebook page, we knew that they fully fitted in with the TNS ethos!

To celebrate the Franceens joining the TNS family they have released a brand new video for the track 'Attack', which is taken from the EP 'Duck and Cover'. You can check it out on youtube now. They are currently recording the final touches of the album, which is due to be released at the beginning of December.

QUEST IONS

OUT OF SOCIETY
NEW ALBUM OUT NOW

STAGE BOTTLES/ FAIR ENOUGH

Are you still up for having a fight sometimes, like you did when you were young? Or maybe you are still young and still fighting? Is it fair enough if corrupt and exploiting capitalists die by ruining their own health? Have you got friends who think they are strong or hard, or would like to be? And who are destroying themselves because of acting like this? Do you refuse to be ignorant? Have you decided to fight for your rights and other's rights? Shouldn't there be only "one world" for serious anti-fascists to believe in? Do you like Punk-Rock with heart and soul? Are you strong enough to prevent society from getting you down? Is your life at risk because you want to survive by being yourself? Aren't wars always cynical? When politicians tell us it's for peace, it's surely just for hegemonic interests isn't it?

FRIENDS FOREVER PUNKS FOR LIFE

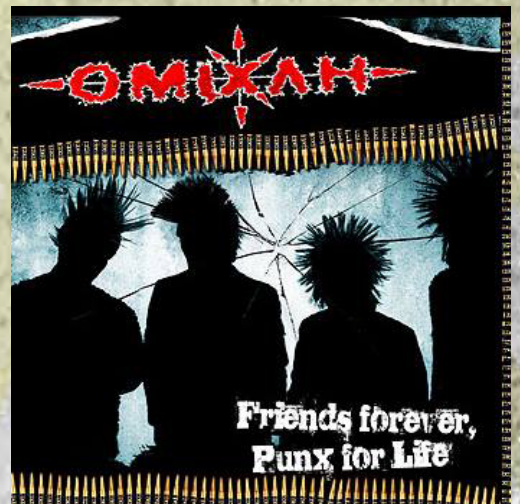

OMIXLH STREETPUNK MADE IN GRECEE

From the country of Zorba and Tzatziki these guys will fuck up your stereo. Omixlh are coming from Thessaloniki, Greece and for more than 15 years are the pride of underground streetpunk scene, with a sincere attitude and full of passion and anger.

Their first album was released in 1996-Antitthesi (that means in English Opposition), two years later they did a split cassette with Karkinoma : Egklovismenoi stin mizeria (Trapped In Misery). They have started to tour around Greece and in 2001 comes the first official release: I diki mas kathimerinotita (Our Everyday Life).

After a lot of struggling in the underground and some line up changes the band release in 2003 a 7" album: Eternal Alive. Soon they started again to tour in Slovakia, Holland, Germany, Romania and also they have appeared in some compilations. In 2007 the best album of their own is released: Friends For Ever, Punks For Life and again in 2009 the same album was released by Joe Pogo Records (different cover and attitude like they say) and the latest material Legion Of Freak again by the same Joe Pogo Records. All in all a band that if you like The Casualties, GBH, or any hardcore/punk band you should listen and give them a try.

PROMO CD'S

PUNK / SKA / OI / HARDCORE

THE LAST RESORT / **THIS IS MY ENGLAND - SKINHEAD ANTHEMS III**

The Last Resort are an icon when it comes to Oi music. After some reedits of their music now in 2013 they have a new digital album: This Is My England - Skinhead Anthems III, 13 tracks for the real deal, real anthems for the oi and punk scene from one of the most old school band in the area. Even if they were together for a little time they remain in the Oi hall of fame along with Business, 4 Skins or Cock Sparrer. Attention All Units the skins are back to town. Pure music from the streets with all the ingredients: football, violence, true friendship, honor and friday nights.

DR. CALYPSO / **SEMPRE ENDAVANT**

The old school gang are back with a new album. Dr Calypso traditional ska from Barcelona are old school indeed formed somewhere in 1989 they bring the new album Sempre Endavant with 13 brand new tracks and they will make you jump and dance with them. First track that was promoted is Live Together they already have a new videoclip on you tube. Traditional ska with reggae for the summer nights on the beach with your mates, good vibes and awesome music. Also we recommend: Ment Positiva and Mr. Walker.

KILLSWITCH ENGAGE / **DISARM THE DESCENT**

KSE are one of the most appreciated acts in metal-core, now they strike with their last release from Roadrunner records: Disarm Th Descent. This is their 6 studio album and probably one of their best, 12 tracks in the pure metalcore, full of force, along with awesome lyrics, packed in a nice design (like all their albums). From the first to last track this album is full of force, angry and melodic riffs, finest metalcore from one of the best acts in this genre (only if we think about the members and their past bands like Blood Has Been Shed, Aftershock, Overcast). This album is a blast for your ears and soul and a must have even if you are not a metal addict. 10+ for everything on this release and 10+ for Roadrunner bands.

BRUTUS DAUGHTERS

EXCLUSIVE INTERVIEW

Mirceone (MPTY ZINE)-Hey guys. Congrats for the album.how are things in the celtic Madrid?

Brutus Daughters: Thank you very much! It took us a bit longer than expected to release it, but there it is at last! Things in Madrid are going on as always, not a very powerful Celtic scene, but we hope it will change in the near future and more people start spreading it!

For the people who don,t know your name,tell us something about the band...how you guys started?

We started 5 years ago, when a group of four girls decided to form a punk folk band and look for someone who could play bagpipes. That was our main goal, then other members fortunately joined the band and we began playing in some pubs until we could support ourselves financially our first album. Although there have been some changes in the band formation up to now, since three of the former members left the band due to work requirements and three more had to leave also due to the same circumstances, it is true that the original spirit hasn't died away, but increases as time goes by. Brutus' Daughters is a group of friends who enjoy playing together and do their best to continue on the scenarios. And concerning the name's origin....well, we chose Brutus because we wanted to show that not always heroes are the ones who triumph, but also anti-heroes like Popeye's enemy, so that what we are... the real bastard daughters of the hero's enemy :D

I read that you have shared the stage with Mahones, personal i am a big fan of finny and co. speaking of them did you have listen the new album.

It's a great work, we're looking forward to going to another gig, we're lucky that they come to Spain very often! What can you tell me about the second album, specially because is a diy album and i know is hard to do something independent these days...

Our second album follows the same criteria of our first one, since we have recorded and produced with what we have earned in gigs and selling merchandising. It's not difficult to keep being independent, but sometimes it takes more time to get an objective, like releasing an album or organizing some gigs together. Being under the direction of a discography is not such a bad idea, who knows...

Speaking of celtic folk and punk...from where you have the influences.

Each band member has brought up listening to different music styles, but we share a common punk folk taste, above all from North American bands, which mix punk music with Celtic instruments and melodies.

What is the band message that you want to be heard?

Our message is not a complicated one, we use our music not just to have a nice time playing together, which is true, but also as a means to communicate what we consider unfair in our society. Most of our songs deal with everyday injustices that each of us experience or witness and we can't help it, it does influence our composition as much as we find inspiration in our surroundings.

Name please 5 bands that have influenced you.

Flogging Molly, Dropkick Murphys, The Dubliners, The Clash and Flatfoot 56.

Regarding the concerts, where can you be seen in the near future?

We are now organizing a tour through Spain and who knows, maybe abroad also. Going to Romania would be a pleasure, too!!

If you will make a split cd with one band, that you like it, what band will be?

That's not an easy question, we've got lots of bands in mind, but maybe we'd choose two bands from Spain, Drink Hunters or Fucking Fuckers, we've been friends for long time.

Mahones or Flogging Molly?

Both of them, we can't answer to this question!!

What plans you have for the future...another album, shows...what do you guys do besides the band?

For the time being we are going to enjoy our second album on stage, but there are some songs which have already being started, ideas are always growing inside and if everything goes as expected, we'll spend next year playing and composing new stuff.
